HOW TO USE OUR BOOKS...

****Interactive Reading****: Hold the book about 8-12 inches from your baby's face. This is the optimal distance for newborns to see the images clearly. Point to & talk about the pictures as you read, even if your baby doesn't understand the words yet.

****Tummy Time****: Place the high-contrast book in front of your baby during tummy time. The bold patterns & images can capture their attention and encourage them to lift their head & strengthen their neck muscles.

****Create a Routine****: Incorporate reading high-contrast books into your daily routine, such as during quiet time or before naps. This can help establish a sense of security & routine for your baby.

****Use as a Soothing Tool****: If your baby is fussy or upset, try using the high-contrast book to calm them down. The simple & engaging images can be a distraction & help soothe your baby.
